

Introducing HRT Insights, a new analytics platform driven by our strategy to support members in improving healthcare outcomes. The Health Roundtable, with our partners Berkeley Research Group (BRG), have created an environment for collaboration and informed decision making through insights and knowledge.

The HRT Insights platform will enable our members to view and drilldown on a balanced scorecard of hospital performance metrics, including clinical quality, patient safety, operational efficiency and financial opportunities.

Mobilising healthcare solutions through insights and collaboration

HRT Insights is powered by DRIVE, a BRG technology. BRG bring to the table shared values and access to a leading technology.

Key Performance Indicators available:

- Relative Stay Index (RSI)
- Predictive analysis: HDxSMR mortality
- Hospital Acquired Complications (HACs)
- Emergency readmissions within 28 days
- Australian national standards
- Costing
- Emergency department

Key Applications

Workflow

Visualise your hospital performance, with simpler user interaction

Focus on what matters; then drive collaboration and identification of solutions

Mobilising healthcare solutions through insights and collaboration

By placing the customer experience and human interaction to forefront of delivering real change in healthcare outcomes.

ANALYTICS APPLICATION KEY FEATURES

Data Integration: HRT INSIGHTS ensures that robust data from multiple data sources is appropriately leveraged to produce the most meaningful analysis. Your data is thoughtfully blended to produce analytics that provide control and knowledge throughout the organisation.

Ease of Use: While your data may be difficult to work with, Analytics is not. Visually driven, with simple user interaction, and drill-down ability, a user can quickly understand the objective, the opportunity and the answer to any question they may need to answer.

Investigative: Reporting is obsolete. Stakeholders must be empowered to understand, research, and investigate areas where meaningful change can be achieved. Analytics does this through its dynamic “top down” approach to analytics that provides summary level answers and record-specific information in the same view.

HEALTH
ROUNDTABLE

INSIGHTS

INSIGHTS APPLICATION KEY FEATURES

An Insights “hub” that is **customisable** for each user’s most important content.

Insights can be launched from any application in the platform – including and beyond Analytics.

Email integration allows on-the-go collaboration, or in-platform communication when deeper investigation is needed.

Optimised for mobile consumption so that insights do not need to stop just because you are not by your computer.

Drives collaboration and rapid identification of opportunities and issues.

Provides a mechanism for performance improvement accountability throughout company operations

Allows direct engagement with HRT experts – during or after a project, near or far – to solve problems, answer questions and provide industry leading best practice and expertise.

Investigation Table			# Major Comps	Total Episodes	Major Complication Rate
DRGB MDC	Diseases & Disorders of the Nervous System	Null	0.000	1.000	0.00%
	Respiratory complications		1.000	1.000	100.00%
	Diseases & Disorders of the Musculoskeletal System & Connective Tissue	Null	0.000	4.000	0.00%
	Healthcare associated infection		1.000	1.000	100.00%
	Diseases & Disorders of the Kidney & Urinary Tract	Null	0.000	1.000	0.00%

ABOUT BRG

BRG provides independent advice and analysis to individuals and organisations around the world. Our clients rely on our ability to apply technology to answer complex questions in a simple way, solve business problems and provide clear, valuable solutions.

To solve a problem in today's competitive marketplace, it is critical to make sense of vast amounts of information. At BRG, we believe that a superior command of data drives superior results. And that's what we do, every day.

BRG DRIVE™ is BRG's Analytics as a Service platform, created to help our clients and consulting teams create and sustain results. Providing clients with an innovative, multi-faceted insight creation platform; DRIVE harnesses and integrates all of a client's dashboards, scorecards and analytics to allow both BRG and Client experts to create actionable insights from disparate raw data. In addition to the core analytic and insight functionality, DRIVE contains a robust application set that can be used to create information, manage workflows, monitor an organisation's key metrics and store curate, qualitative information among several other functions. All applications are tightly interwoven to seamlessly and easily help our clients harness the most important information to drive informed business decisions.
