Our Allied Health Improvement Group, in partnership with the Australasian Allied Health Benchmarking Consortium (AAHBC) has been collecting and comparing Allied Health activity data for over 18 years. The data is used to drive change and innovation in the delivery of patient care.

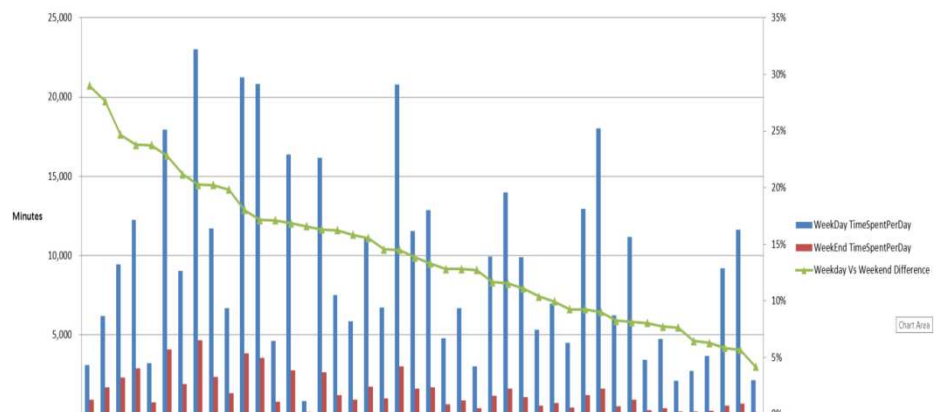

In 2017 the theme was “Demand vs Capacity in delivering Allied services for acute patients”. We benchmarked **5.1 million Allied Hours** of service across **900 ,000 patients** looking for service outliers, trying to help identify if more or less is better.

In 2018 the theme is “How to measure patient outcomes under a value based healthcare system, delivered by Allied Health Clinicians in hospitals?”. We will continue to focus on Allied Health activity in hospitals for Inpatients, Outpatients and ED patients to identify variation. We will encourage discussion on where Allied activity is considerably different from the group average for a cohort of patients in your hospital.

Allied Health Reports Available

7-day Allied Hospital service comparisons

Allied Health Improvement Group

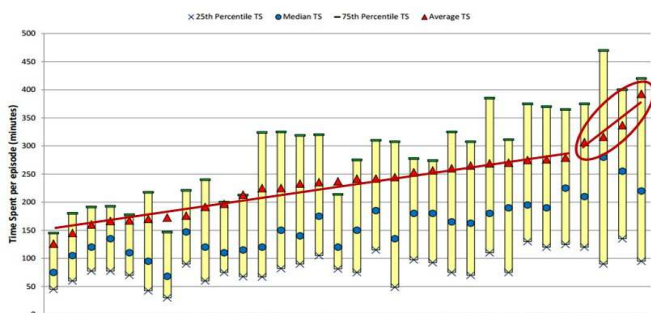

What do you need to do?

- ❑ Designate a liaison representative as a key contact for this group
- ❑ Provide detailed activity data from your Allied Health system
- ❑ Use the Allied Health reports to identify differences in practice, and contact other participants to identify innovations in patient care
- ❑ Select an improvement project based on the data, and share your results with other organisations at the annual meeting
- ❑ Organise a delegation to attend the annual meeting—up to 4 delegates per health service

What does The Health Roundtable do?

- ❑ Collect and process your annual Allied Health data.
- ❑ Merge Allied Health data with inpatient episode data to provide a suite of comparative reports.
- ❑ Facilitate the annual meeting to identify innovative practices and encourage action to improve the patient journey.

The Health Roundtable helps health executives learn how to achieve best practice in their organisations. We collect and analyse operational and clinical data of our member organisations to search for innovations in patient care. We promote collaboration and networking amongst health executives and staff through our roundtable meetings, workshops, and other activities.
