Members of the group will link benchmarking and innovation to drive efficient Imaging performance. The Imaging benchmarking reports will be used to validate good practices and process improvements, but also to assist teams in identifying areas to monitor.

Members of the group provide detailed activity data for each patient encounter for comparative analysis by The Health Roundtable. This is merged with inpatient and ED episode data to provide additional insights. The annual Imaging Improvement Group workshop will provide time to discuss contemporary issues and innovative practices to improve your Imaging service.

HRT will continue to provide our new executive summary report allowing you to see at a glance how your imaging department compares with other members across key modalities and performance measures.

Comprehensive suite of reports to help you compare activity

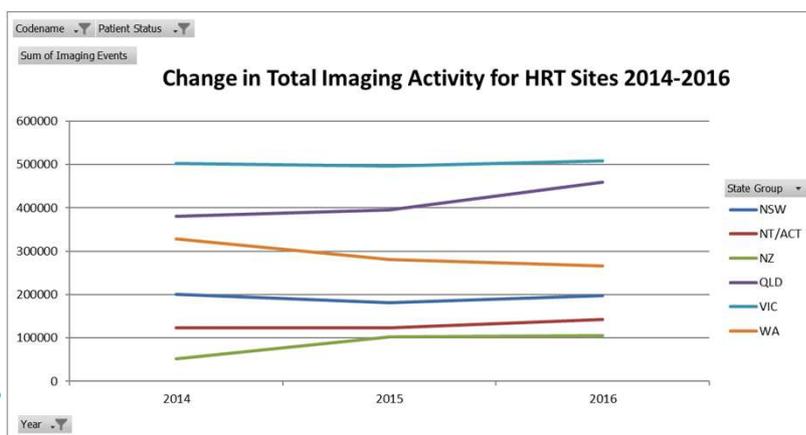

Figure 1 - The suite of Health Roundtable Imaging Reports shown diagrammatically

Analysis of 2014, 2015 and 2016 data from all HRT sites shows:

- Total imaging activity (ED+IP+OP) across all HRT sites grew 6% despite a sizeable decrease in volumes for WA due to activity shift to Fiona Stanley Hospital.
 - NT+ACT - increase of 6%
 - NZ - increase of 102% (across the board rise but led by ED imaging activity)
 - QLD - increase of 21%
 - VIC - increase of 1%
 - WA - decrease by 26%

What do you need to do?

- Designate an imaging liaison representative as a key contact for this group
- Extract "RIS" imaging data for your health service and submit as requested
- Organise a multi-disciplinary imaging team of up to 4 people to attend the Group meeting
- Identify an improvement innovation and share progress with other member health services

What does The Health Roundtable do?

- Work with key liaison contacts to plan the annual meeting
- Analyse RIS data to provide key comparisons amongst participants
- Provide reports comparing the timeliness and cost effectiveness of imaging services by modality and DRG
- Facilitate the annual meeting to identify innovative practices
- Track progress on action plans

The Health Roundtable focus for Imaging in 2018 will be to boost membership in order to improve benchmarking and data utility. Further updates in data presentation and access will be progressed.

The Imaging Steering Group will continue to review and consolidate the current Imaging reports in an effort to contemporize the service to members.

Health Roundtable has a new Product Manager for Imaging Steve Bickford who is a former Director of Medical Imaging and will make contact with all sites to discuss how HRT might assist their services, as well as the upcoming Imaging Improvement Group meeting in May 2018.

Dates	Timeline 2018
2 Feb	RIS submission deadline for 2016/17
25 April	2016/17 Imaging reports on website
2 May	Pre-meeting Briefing package
9-10 May	Imaging Workshop - Brisbane

The Health Roundtable helps health executives learn how to achieve best practice in their organisations. We collect and analyse operational and clinical data of our member organisations to search for innovations in patient care. We promote collaboration and networking amongst health executives and staff through our roundtable meetings, workshops, and other activities.
