The Imaging Improvement Group provides benchmarked information across the full gamut of Medical Imaging services, and brings Australian and New Zealand sites together to share ideas, innovations and find solutions to common challenges.

Reporting information has been streamed into three categories:

- a) Patients' access to care
- b) Patients' safety and quality of care
- c) Patients' value from care

The Imaging Improvement Group workshop is an excellent forum for discussion and a great opportunity to hear from leading experts in the field and share innovations from our membership. This year's primary theme is **The Medical Imaging-Hospital Interface**:

- How to integrate better with hospital projects/programs?
- How to foster more professionally useful relationships with referrers?
- How to project influence over non-Imaging decision making?

The workshop's sub-theme is **3D printing and the role of Imaging**:

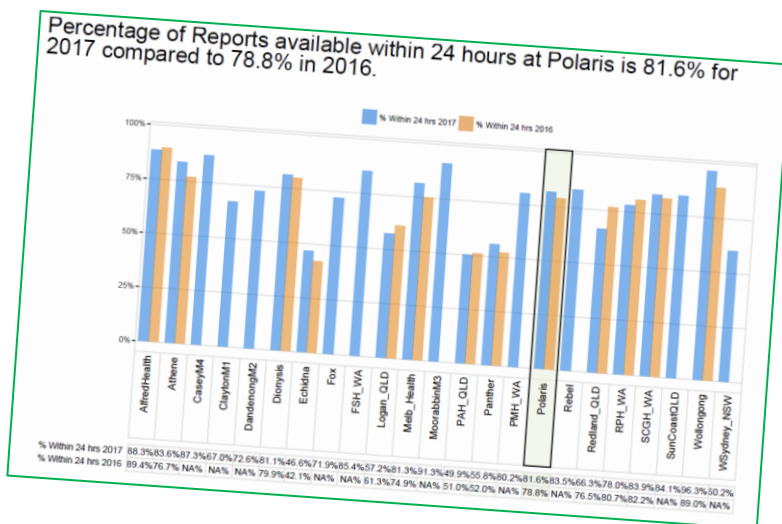

- Is this a natural fit?
- What is required for us to be prepared?
- Who is already involved?
- What are the implications for radiology/imaging practice going forward?

Imaging & Diagnostic Services Improvement Group

What do you need to do?

- ❑ Designate a key liaison contact for questions and follow-up
- ❑ Submit surveys as required
- ❑ Track progress and report on current improvement projects
- ❑ Organise a delegation to attend the annual workshop—up to five people
- ❑ Identify an improvement objective for implementation based on innovative ideas

What does The Health Roundtable do?

- ❑ Works with national and international experts to identify key trends and innovations Imaging
- ❑ Surveys participating health services to identify innovative practices that are already improving Imaging
- ❑ Summarises the meeting and circulate all presentations
- ❑ Tracks progress on your action

We hope you can join this growing group and share your wisdom as well as gaining new knowledge from your peers.

The Health Roundtable helps health executives learn how to achieve best practice in their organisations. We collect and analyse operational and clinical data of our member organisations to search for innovations in patient care. We promote collaboration and networking amongst health executives and staff through our roundtable meetings, workshops, and other activities.
